COUNTRY 2315 HAY AND SILAGE, VERY DRY

Grassland mixture for cutting and grazing in dry areas with difficult climatic conditions

Mixture composition

60 % Dactylis glomerata
20 % Festuca arundinacea
20 % Festuca pratensis

Main characteristics

- All used species were chosen to produce forage in very dry areas, Dactylis glomerata is best suited
- Festuca pratensis increases yield and forage quality
- Grazing and cutting are both possible
