COUNTRY 2303 OR- GANIC LAND

Grassland mixture for wet, peaty soil, for organic land

Mixture composition

- 15 % Lolium perenne
- 30 % Festuca pratensis
- 30 % Phleum pratense
- 25 % Festuca arundinacea

Main characteristics

- The used species were selected due its suitability for wet and peat soils with a high water content
- Additional to a very good tolerance to wet conditions, winterhardiness of the used species is an important topic. This is valid especially for Phleum pratense, Festuca pratense and Festuca arundinacea
- Lolium perenne achieves high yields and gives a plus in forage quality
