COUNTRY 2309 PROTEIN

High energy and quality mixture with clover
for additional energy and quality in grassland

Mixture composition

40 % Lolium perenne intermediate (tetraploid)

35 % Lolium perenne late (tetraploid)

20 % Red clover

5 % White clover

Main characteristics

- The tetraploid Lolium perenne varieties are responsible for high sugar contents, better palatability and increased feed intake
- Red and white clover lead to additional energy and quality
- Red and white clover are able to fix atmospheric nitrogen, so nitrogen fertilization in total can be reduced
- Especially suited for two to several years lasting grassland, mainly cutting
- The name of this COUNTRY-mixture in Germany is COUNTRY Energy 2026 Eiweiß
