LIFLEX

Dense and healthy

LIFLEX scores with a very good sward density and a good health. As first variety in Germany it achieves the classification in the early maturity group "3" and therefore it differs from all listed varieties. The total dry matter yield, the yield in the first and further cuts and the low susceptibility to stem rot of clover and alfalfa are worth mentioning.

BSA-classification 2005 (Germany)

Start flowering	3
Formation of yield at the beginning	6
Winter hardiness	5
Sward density	6
Total dry matter yield	6
Dry matter yield first cut	6
Dry matter yield following cuts	5
